ABOUT ME

I am a 24-year-old Software Developer, with a strong passion for backend development. My technical expertise includes software development, computer networks, big data, and artificial intelligence. I recently completed my thesis project which was about a social media app that uses AI for data extraction and the enhancement of user recommendations. I am eager to apply my skills as a backend developer, aiming to deliver innovative solutions and contribute effectively to a team. For more about my projects, visit my GitHub profile.

My Thesis project: https://github.com/Mnlsvt/recom_system

WORK EXPERIENCE

Military Soldier

Greek Army   Sep 2024 - Jun 2025

I served as a soldier for nine months to fulfill my mandatory military service in Greece.

Backend Software Developer

Evline   Oct 2023 - Apr 2024

Contributed to server-side development at a Silicon Valley-based company using Node.js, NestJS, and TypeScript. Aimed to enhance the scalability and efficiency of backend systems, supporting robustness and high service performance.

Team Leader

Technology Without Borders   Mar 2024 - Present

I am currently leading a team of interns on a small-scale project, where I provide guidance and mentorship throughout the development process.

Software Developer Intern

Technology Without Borders   Jun 2023 - Sep 2023

During the internship, I developed a web application focusing on user-centric features and seamless interaction. I also implemented some data extraction and manipulation strategies, crucial for integrating and optimizing data flow for an improved app performance.

ETL Development

Evline   Sep 2023 - Mar 2024

I developed an SSIS ETL Integration using Microsoft's Azure environment.

VOLUNTEERING

WIKIMEDIA Foundation Volunteer

I actively contribute to the Wikimedia community, dedicating my efforts to make meaningful contributions wherever possible.
